React
Lightning.js

Brightscript
SceneGraph
XML
HTML

Backend

PHP
Laravel

Database

Sql
Firebase

Design

Photoshop
Figma

EXPERIENCE:

MTS Sistemi I Integracije

2022-Now

Roku Developer (MOVE 1.0.0 - 3.0.0)

2022-Now

Fronted OTT Developer (MOVE 1.0.0 - 3.0.0)

2022-2024

My role involves designing and developing the frontend of MOVE, an OTT/IPTV application within Telekom Srbija Group, for set-top boxes and Smart TV devices running on Android TV, webOS, Tizen, Vidaa, and Roku. In addition to OTT development, I also worked on admin and middleware panels used by vendors and partners to manage application content and services. I integrate REST APIs and third-party libraries to enhance application functionality and user experience.

On the Roku platform, I developed an OTT application from scratch using BrightScript and SceneGraph, building a custom internal framework for screen rendering, state management, and reusable components. I implemented playback logic for Live TV, Catch-up, Start-over, and VOD, and prepared testing scenarios required for Roku Store certification.

Additionally, I managed Tizen, webOS, Vidaa, and TitanOS seller accounts, overseeing application submission processes and communicating with platform representatives to ensure successful store deployment.

Available on Roku Channel Store: [Roku Channel Store](#)

Other Web Projects

Pržionca (2026)

<https://przionica.rs/>

Custom WordPress e-commerce website theme developed for a coffee roastery, with integrated online payments and payment gateway for secure card transactions.

Beostud (2026)

<https://beostud.rs/>

Full-stack web application developed with Laravel for browsing and renting professional film equipment, including backend logic, database management, and a responsive frontend interface.

Zlatiborac Nagraduje (2025)

<https://www.zlatiboracnagradjuje.com>

Promotional website developed in PHP for a leading meat production company in Serbia, focusing on optimized frontend performance, responsive design, and clear presentation of products and brand content.

MTS Sistemi I Integracije (2024)

<https://mts-si.rs/>

Custom WordPress presentation website developed from scratch according to a pixel-perfect design, using PHP, HTML, CSS, and JavaScript.
